

# SUSTAINABLE BUSINESS LEADERSHIP FORUM

INSTITUTED BY SUSTAINABILITY OUTLOOK

Sustainable Business Leadership Forum (SBLF) is an invitation-only Indian industry focused market development platform connecting thought leadership, business know-how and catalytic tools for enabling organizations to transition towards sustainable business practices.

The Forum equips organizations, managers and industry stakeholders on the 'how' of sustainability through a unique programmatic approach comprising of **year round programs** and 'on-ground industry oriented' work. The forums meet once a year at an Annual Summit usually organized early in the last quarter of the year.

### Value of participating in the Sustainable Business Leadership Forum

- Access to extensive research conducted on multiple business sustainability issues
- Insight into emerging drivers on Resource Conservation and preparing firms for a value oriented response to the same
- Opportunity to coordinate actions in selected areas along with catalysts and other industry players
- Engagement with like-minded organizations, catalysts and industry bodies through participation in working groups and multi-partner consultations
- Opportunity to enable dialog, insight and action on capacity enablement of the sustainability ecosystem

### Shape Industry Working Groups

In addition, based on member inputs and requests for focused research, the Forum facilitates creation of Industry Working Groups. Ongoing industry working groups include:

- **Resource Efficiency and Management** areas such as catalyzing demand side management initiatives for promoting energy efficiency; shaping Decentralized Renewable Energy (DRE) systems for industrial and rural energy usage; amongst others.
- **ESG Sustainability Disclosure and Reporting** with a focus on developing Environmental and Social (E&S) benchmarks for corporate India and creating tools for investors and businesses to leverage E&S for mutual gain.

Working groups under formation will touch on issues such as **Water as a Business Risk, Sustainable Transportation, Sustainable Consumption**, amongst others.
